<b>Section 2- Event administration</b>	
Overall satisfaction with event organization	6.1(4,7)28
<b>Section 3- Event facilities</b>	
Quality of venue	6.3(5,7)28

<p>Comments and suggestions :- Please include if the talk met your expectations.</p>	1	The talk were quite satisfactory(3). Keep up the good work; Overall fruitful training on congenital anomalies.(2)
	2	Informative -yes; Inclusion part of participation less; Little improvement in co-ordination.
	3	Event was very nice management of programmes was good. I would like to attend more on clinical topics to be arranged.
	4	Very enriching talks of expertise was upto the mark. Some notes should be provided on the topic if possible.
	5	The workshop was really informative. All the sessions were very interesting and informative. But I really feel since we can do very little once we discover about anomalies, we should be focusing more on <u>preventive measures</u> for anomalies
	6	The crowd was mixed and some speeches did not go with the crowd; there seemed to be no real link between the talks. All very fragmented.
	7	Time for panel discussion should be more so that more interaction can be carried out
	8	There is always scope for better
	9	Very good. Looking forward for such more workshops particularly on 1) Prenatal Diagnostics test 2) Communications 3) Nutrition and anomalies 4) Female foeticide 5) HIV/AIDS
