

# Seeding Tomorrow's Enterprises Today

[www.venturecenter.co.in](http://www.venturecenter.co.in)

## Vision

To be the organization that will be credited with creating, shaping and sustaining a "Pune Cluster" of innovative technology businesses with a significant economic impact regionally, nationally and globally within the next 20 years.

## Mission

To nucleate and nurture technology and knowledge based enterprises for India by leveraging the scientific and engineering competencies of the institutions in the region.

# **Venture Center's Philosophy**

*on Social Enterprises*

**Social enterprises need to be run like any business. They need to**

Gather & deploy resources

Deliver solutions for needs

Have models of sustainable growth

**But they distinguish themselves by**

Focusing on  
social impact

Addressing  
society's most pressing  
problems

Leveraging  
good-will in resourcing  
enterprises

# Focus of Venture Center's Initiatives for Social Enterprises

Supportive & rich eco-system

Additional fund raising  
business management skills

Early stage soft funding options

Networks and visibility

Access to thought leaders and  
champions

# **Supporting Social Enterprises**

*Through Include Program*

# In Partnership with CSIR-NCL & CSIR-800

## INCLUDE

INCLUDE is Venture Center's program for supporting social enterprises in partnership with CSIR-NCL and the CSIR-800 program.

### Social Enterprises: A Venture Center perspective

The Venture Center's defines Social Enterprises as those companies with the following features:

- Companies that aim to provide a solution to a significant problem or need of society and people at large especially under-served and under-privileged sections of the populations
- Companies with a financially sustainable business model and/or a for-profit orientation (all though the profit targets may be muted).
- Companies that benefit from good-will from investors (patient capital), funding agencies/ foundations/governments, employees, strategic partners, suppliers/customers etc due to the social goods & services that the company can deliver.
- Companies pursuing an agenda of inclusive innovation. Supporting technologies/ innovations/ enterprises aiming to deliver significant social impact. MLM (coined by [Dr RA Mashelkar](#)) stands for "More from Less for More" highlighting the need for technologies that deliver more value from less resource for more people.

## Biogas Application

Biogas is generated by bacteria in the process of biodegradation of organic material under anaerobic conditions. kg of food waste can generate 80 liters of biogas equivalent to 32 grams of LPG, sufficient for 10 minutes of heating/cooking.

Monday, July 11, 2011

### ECO-FRIENDLY CYCLE OF SUGARCANE FARMING

#### ECO-FRIENDLY CYCLE OF SUGARCANE FARMING

Deepak Kanhere

#### ABSTRACT

When agriculture waste is decomposed, the important gases are vaporized & get wasted. In this article, we will see how biogas can be produced by anaerobic digestion of various agricultural wastes such as sugar factory effluent, distillery's spent-wast, sugar beet, sweet-sorghum etc. Not only will methane be used for electricity generation

**BoPEEI CHAKRA GENERATOR**

**Using technology to solve common man's energy needs.**

Flagship Project: BOPEEI Team has developed an electricity generator (Patent Pending) based on Human Power. Called the Chakra Generator™, the system generates electricity with just 10-12 minutes of easy pedaling by any user. Pedaling effort is designed in a way such that people of ages 9 to 70 year old can generate their own power easily. This Power is stored and later used to generate 4-10 hours of bright lights using BoPEEI's Prakhar™ series Lamps. For more info click here.
