1 = Bad
2 = Below average
3 = Average
4 = Very good
5 = Excellent

Comments	
	1 Very informative class.
	2 Includes a good set of references at the last page of printed slides. Some slides were missing from the printout. Nice food. Thankx for the ICE Cream
	3 The content were very good and especially the lab session helped in understanding the techniques. I felt that the pace was a bit more for better undersyanding of the concepts. It may have been conducted in 2-3 days span of time.
	4 W/s is very informative
	5 It is very nice to attend. It is very helpful to me in my professional work.
	6 A lot of info. Was made available and more so it is coming from the trainer who has actually worked on the instruments. Thanks!
	7 It becomes bit tidious to have 9 hr workshop in a day better to divide it 2 days i.e Saturday and Sunday (5 hrs each) so that the idea is explained more detailed.
	8 In all it was a nice experience. But first you can keep topics which are more general and make 2 day event. Anyways, its actually not a 900 bucks worth. But it's allright otherwise every other aspect are good.
	9 Very properly organized. Good exposure to various technology enhancement.

10	This w/s is very helpful in my future also. It is good experience aslo. It also help me to understanding the basic concepts of instruments.
----	---

How do you think can these workshops be improved further?	1	By increasing the number of days.
	2	Include Class studies more
	3	The W/s can be extended or conducted for 2-3 days.
	4	By increasing the duration of the workshop.
	5	Two days for this content is good. Practicle session for participants
	6	No. Its very excellent and good management.
	7	They are good.
	8	By divideing it onto 2 days
	9	Make these 2 days thing. Each day having both theoretical and lab components.
	10	Theory portion was long, it's not possible to listen everything with concentration.
	11	By giving certain data about topic and streamlining the knowledge required prior the w/s
	12	By giving some prior info about the w/s topics.
	13	By giving the more examples for the calibration and practicles.
	14	A brief detail about what we are going to learn via mail.
	15	More practicals.

How did you hear about this event?	No. of participants
