

NCL Technology & Entrepreneurship Club

About NCLTEC

NCL Technology and Entrepreneurship club (NCL-TEC) is a club driven by research fellows and associates at NCL that aims to provide a common platform/forum for people with a shared interest in technology and translating it into products and services useful to people. The Club plans to focus on various aspects of technology, innovation and entrepreneurship. The club shall plan and organize lectures, workshops and other events for the mutual benefit of the club members. The club is an independent, non-profit entity with full strategic and operational freedom.

Membership of NCLTEC

The membership of NCL-TEC is open to any current or past research fellow, associate, project staff or regular staff at NCL. The Club is actively managed by current research fellows, associates and project staff. The Club plans to constitute an advisory board of experienced advisors, well wishers, supporters and mentors.

Activities Planned

- ❖ Inspirational talks & movie shows
- ❖ Educational workshops & lectures
- ❖ Tech Idea Competitions
- ❖ Business Plan Competitions
- ❖ Networking events
- ❖ Mentoring sessions
- ❖ E²: Evening with Entrepreneur

Science entrepreneurs with NCL roots

Dr Anji Reddy, PhD 1969

Founder & Chairman,
Dr Reddy's Labs.

Dr AV Rama Rao, PhD 1964

Founder & CMD,
AVRA Labs.

Recent events

Patent Seminar

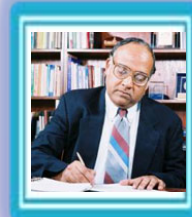

August 22nd -23rd 2008

Indian patent Office in association with GMGC (Intellectual for intellectuals) and partnership of NCL technology and entrepreneurship club organized 2 day workshop (22nd and 23rd August, 2008) on intellectual property and patenting at NCL Innovation Park.

From Directors Desk

It is indeed very gratifying that the research students of NCL have formed a Technology and Entrepreneurship Club with a view to forge a common platform for discussing all aspects of technology entrepreneurship.

Entrepreneurship is a quality that is important for every professional to imbibe - irrespective of whether he works for himself or others. Increasingly, scientists have to take the knowledge they create in the laboratory to their stakeholders. Entrepreneurship is a means of accomplishing this task. Furthermore, we need to learn the disciplined process by which we can create wealth in our society through application of science and technology. Entrepreneurship also builds leadership, team spirit, an ability to take risks and the power of communication

I do hope our research students will imbibe the true spirit of entrepreneurship and grow into useful citizens who will create and distribute wealth to all sections of our society. I wish them the very best in their endeavors. I also wish to reiterate the support of this Laboratory in pursuit of this dream.

Dr. S. Sivaram,
Director, NCL

Management Team (2008-09)

President
Mr. Sarvesh Soni

Secretary (Group-Activities)
Mr. Kumar Babu

Secretary (workshops)
Mr. Shailash
