Data Challenge for Maternal and Child Health

Data Science Approaches to Improve Maternal and Child Health in India

Grand Challenges India

A Grand Challenges India funding opportunity

Mandate

- Challenge seeks innovative data analytics solutions to improve maternal and child health in Indian context.

- By analyzing existing data arising from multiple sources in India such as publicly available data, clinical research, cohort and survey studies and other related data sources.

- Support innovative collaborations between Indian clinical research scientists, healthcare experts, and data scientists/data modellers

- Grant will consist of upto $100,000 USD per project grant for developing data analytics tools and models for 12-18 months

Please visit the BIRAC website at www.birac.nic.in and follow the link to the registration and and submission portal

Call closes on 17th Aug 2018: Online portal for submissions closes at 2:00 PM, IST
