

# Thermo Scientific Forma 371 Steri Cycle CO2 Incubator

#

These reliable, direct-heat incubators feature an in-chamber HEPA air filtration system that continuously filters the entire chamber volume every 60 seconds and maintains cleanroom-like Class 100 air-quality conditions. Class 100 air quality conditions are achieved within five minutes following a routine door opening. Additionally, an on-demand 140°C high-temperature sterilization cycle eliminates contamination from all internal surfaces simplifying cleaning procedures.#
